Dear Karen,

**Re: Plan for the Noupoort CSP Project at upon PPA conclusion**

The Noupoort CSP Project is being developed for participation in the Department of Energy's Renewable Energy Independent Power Producer's Procurement Programme. Should the project be successful in being awarded preferred bidder status and sign a Power Purchase Agreement with Eskom Holdings SOC Ltd the plant would be operated for a 20 year period following the Commercial Operations Date.

Upon conclusion of the 20 year Power Purchase Agreement period the project intends to follow either one of two plans as follows:

Option 1 – Complete Decommissioning

The project owner will decommission the plant and undertake the removal of all infrastructure constructed. The project site will be rehabilitated for the purpose of reverting to use as livestock grazing land.

Option 2 – Renewal/Extension of Power Purchase Agreement

Should it make commercial sense the project owner will negotiate the extension of the PPA with Eskom SOC Ltd, or another suitable offtaker for the power. The intention would be to utilise updated technology as is available in the market and acceptable to the Department of Energy at the time.

Your Faithfully
